10. PUBLIC HEARING

10.1 Gasoline Service Station Facility Evaluation
Assistant Planner Pauletta Cangson discussed the history of this project and the different actions presented to the Town Council.

Planning Director Peter Chamberlin noted there is a ground water remediation facility on the site, which if the Council decides to move forward with the proposed project, would continue to operate.

Allen Tilton, of Whitlock and Weinberger, Traffic Engineering Consultants, discussed the reasons why the Traffic Impact Study for planned improvements to Shiloh Road, between Caletti Avenue and the US 101 Highway southbound off-ramp, clearly...
demonstrates that the recommended left-turn lane together with lane transitions of the assessment district cannot be achieved.

Ron Allen, of Allen Consulting, Santa Rosa, said that Mr. Shami (the applicant) is aware of the traffic impacts of the proposed project and is willing to redesign the frontage of the site to accommodate right-turns in and right-turns out only.

Responding to questions raised by Council, Mr. Walter Laabs explained why there should be a barrier to the east of the property to restrict left-turn movements.

Mayor Salmon offered members of the audience an opportunity to speak at this time.

Richard Olufs, owner of property west of the site, raised concerns associated with the filtering pump station and traffic backing-up at the pumps due to their close proximity to the road.

No other comments from the audience were forthcoming.

Council discussion ensued, after which Council determined that the proposed gas station remodel was an appropriate use for the site, as this site was previously identified as a location for a gasoline service station due to its close proximity to Highway 101. In addition, Council concurred to refer the application to the Planning Commission for review and action, and requested that the following comments be forwarded:

1. Left-turn in and left-turn out movements will be restricted at the project site.
2. Canopy lighting shall be recessed into the canopy and not glare onto adjacent properties.
3. Overpass and off-ramp items discussed during previous projects (e.g. Shiloh Commercial Center) should be addressed as part of this project to prevent future conflicts.

On a motion by Councilmember Fudge and seconded by Councilmember Allen, the Town Council determined that the proposed gasoline service station remodel was an appropriate use for the site and referred the application to the Planning Commission for review and action. The motion passed by a 5/0 vote.

Town Engineer and Public Works Director Richard Burtt briefly discussed the necessary steps to acquire real property and direct the filing of eminent domain proceedings.

Mayor Salmon called for comments from the public at this time.

Richard Deringer, Sonoma, representing Windsor Water Works, said that the property owners of the Windsor Water Works property are not opposed to condemnation proceedings, as the Town has determined that acquiring the subject property is in the best interest of the Town. He said their only concern is that the property being acquired will eliminate their ability to build a bridge to Bell Road.

No other comments from the audience were forthcoming.

Councilmember Allen explained the reasons why he does not support the use of eminent domain proceedings for future property acquisitions. However, he said that in this particular instance, there is a strong need for the use of eminent domain and will support this action.

Council discussion ensued relative to the appropriateness of eminent domain proceedings to acquire property. The majority of Councilmembers were supportive in this instance, as it is a public improvement that will directly benefit the Town.
